

Firstly, you need to know AskAI was not developed to replace Copilot like for like.

Not everyone needs the same set of tools!

Tools & Equipment Example

For everyone

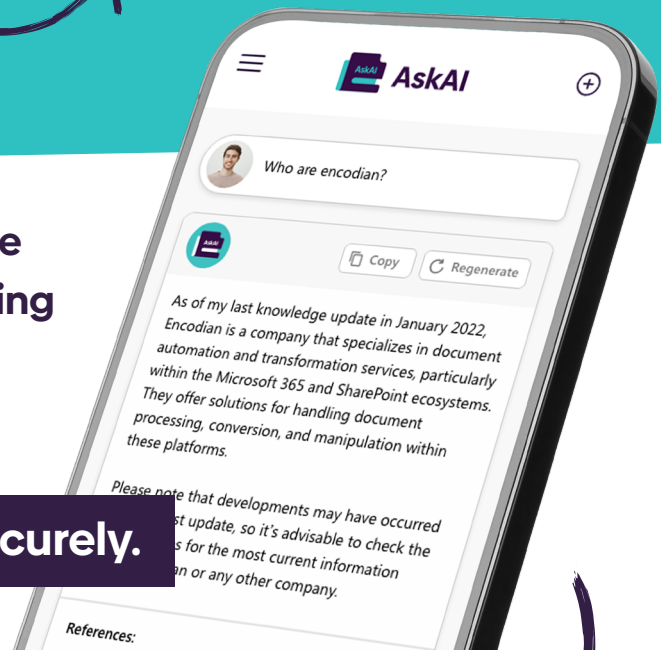

Specific roles

AskAI provides you with an accessible and cost-efficient tool for users seeking to find and summarise information using 'natural language' prompts.

ChatGPT deployed at scale, securely.

So, when should I use AskAI?

- ✓ I want to deploy large language models at scale across my organisation.
- ✓ I have a group of users who want to use 'natural language' to quickly find, summarise and refine information across my organisation's data or the internet.
- ✓ I want authentic 'ChatGPT' level responses without further abbreviations.
- ✓ I want to have control and visibility of what data is being surfaced
- ✓ I want confidence that users are only accessing data they have permissions for.
- ✓ I don't need the document generation capabilities used by Copilot - why pay for it?

Comparison Chart

Category	AskAI	Copilot	AskAI + Copilot
